## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1-19, "characterized in that" should be replaced by the transitional phrase - - comprising- -, or similar language.

In claim 4, "such as" is indefinite and does not define the metes and bounds of this claim with respect to the "solid matter".

Claims 10, 11 and 18 are indefinite in reciting "preferably", because it is not clear whether applicant intends only the preferred limitations/embodiments to be considered as part of his property.

In claim 19, line 1, "simultaneous manufacture" is unclear. It is not clear which compounds applicant intends as being simultaneously manufactured: urea phosphate and ammonium phosphate or some other compound(s). Applicant recites "and/or" in line 2, which adds to the confusion.

Claim 14 provides for the use of urea phosphate product, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it

Art Unit: 1761

merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 14 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 6, 9, 13-15, 17 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by CA 939876.

See the claims and examples, which teach the ratio of reactants, the pH value, and the temperatures. See also page 2, lines 18-22, which teach the details in the manufacture of ammonium phosphate.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
